

BRINGING QUALITY TO THE SURFACE

**IRISH TAR**

## PERMAPATCH

**Permapatch** is a specialist road maintenance product which has been engineered for use in high velocity patching systems. It is a cationic bitumen emulsion formulated to give good cohesion and excellent adhesion to a variety of stone types.

### ADVANTAGES OF PERMAPATCH

- Viscous material for improved application.
- Suitable for all patching equipment.
- Storage stable emulsion.
- Excellent adhesion to chippings.
- Can be cold-applied.

**Permapatch** complies with The NRA Binder Specifications: RC 380/13 Table 1.

**Recommended Temperature:**  
Storage and Spraying 50°C
